DWA_03.5 Knowledge Check_DWA3.2

---

1. User story(ies) in Gherkin syntax for the "+" button.

```
## Incrementing the Count

    - As a user, when I press the "+" button in the tally count app, I expect the count to increase by 5
    - As a user, when I "click" the "+" Button, the count should update immediately, without any noticeable delay.
    - As a user, The "+" button should remain active and responsive to further clicks until the count reaches +25 and then turn greyed out and red to
    indicate max add limit reached
```

---

2. User story(ies) in Gherkin syntax for the "-" button.

```
## Decrementing the Count

    - As a user, when I press the "-" button in the tally count app, I expect the count to decrease by 5
    - As a user, when I "click" the "+" Button, the count should update immediately, without any noticeable delay.
    - As a user, The "-" button should remain active and responsive to further clicks until the count reaches -25 and then turn greyed out and red to
    indicate max add limit reached
```
